About Us

Welcome to **Sunshine Technologies Pvt Ltd**, a leading provider of innovative engineering solutions dedicated to delivering excellence in every project. Founded with the mission to transform ideas into reality, we specialize in offering a wide range of engineering services, from design and development to testing and optimization, across multiple industries.

At **Sunshine Technologies**, we pride ourselves on our commitment to quality, sustainability, and efficiency. Our team of experienced engineers leverages cutting-edge technologies to solve complex problems, delivering tailored solutions that meet the unique needs of our clients.

With a focus on continuous improvement and a passion for engineering innovation, we work closely with our clients to ensure the successful execution of every project. Whether you're looking for advanced product design, automation, or system integration, **Sunshine Technologies Pvt Ltd** is here to provide the expertise and support you need to achieve your goals.

Our Services

1. Product Design and Development

We offer comprehensive product design and development services, taking your concepts from ideation to final implementation. Our team ensures that every design is innovative, efficient, and scalable for the future.

2 Automation and Control Systems

With a focus on continuous improvement and a passion for engineering innovation, we work closely with our clients to ensure the successful execution of every project. Whether you're looking for advanced product design, automation, or system integration, **Sunshine Technologies Pvt Ltd** is here to provide the expertise and support you need to achieve your goals.

Our Services

1. Product Design and Development

We offer comprehensive product design and development services, taking your concepts from ideation to final implementation. Our team ensures that every design is innovative, efficient, and scalable for the future.

2. Automation and Control Systems

Our automation solutions help streamline industrial processes, increase productivity, and reduce operational costs. We design and implement control systems tailored to your specific needs, ensuring maximum efficiency and reliability.

3. Structural Engineering Solutions

From residential to commercial projects, we provide expert structural engineering services, ensuring that all designs are safe, cost-effective, and meet industry standards.

4. Electrical and Electronics Engineering

We specialize in designing and implementing electrical systems, offering solutions for power distribution, circuit design, and automation, among others. Our engineers work to meet your project's specific electrical requirements.

5. Systems Integration

We offer seamless systems integration services that help you optimize various components into a unified solution, improving efficiency, reducing downtime, and maximizing overall performance.

6. Research and Development (R&D)

At Sunshine Technologies, we invest in research and development to push the boundaries of innovation. Our R&D services help bring new technologies to market while optimizing existing products and systems.

Our Services

Product Design and Development

We provide end-to-end product design services, from concept through prototyping and manufacturing. Our engineering team works with you to create innovative solutions that are efficient, cost-effective, and ready for mass production.

Automation and Control Systems

Our expertise in automation and control systems helps optimize your operations. We design custom automation systems that enhance productivity, reduce costs, and ensure reliable, safe performance for industrial applications.

Structural Engineering Solutions

Our structural engineers provide innovative and sustainable solutions for buildings, bridges, and other infrastructure projects. We focus on safety, durability, and cost-efficiency, ensuring your project stands the test of time.

Electrical and Electronics Engineering

From circuit design to complex electrical systems, our electrical engineers provide integrated solutions tailored to your specific requirements. We specialize in creating safe, efficient, and high-performance systems for various industries.

Systems Integration

We offer comprehensive systems integration services that help streamline your processes. Our team integrates hardware and software solutions to ensure seamless operations across all systems, enhancing efficiency and performance.

Research and Development (R&D)

Our R&D services help bring new ideas to life. We work closely with clients to develop innovative solutions, prototypes, and technologies that push the boundaries of what's possible, ensuring a competitive edge in the market.

Automation System for Manufacturing Plant

We developed a custom automation system for a manufacturing plant, improving efficiency and reducing manual labor.

Status: completed

Start Date: 01, January 2023

End Date: 03, March 2023

Team Size: 15

Product Design for Consumer Electronics

Our team successfully designed a new consumer electronics product from concept to prototype, ready for production.

Status: completed

Start Date: 04, April 2023

End Date: 06, June 2023

Team Size: 12

Structural Engineering for Commercial Building

We provided comprehensive structural engineering services for the construction of a high-rise commercial building.

Status: active

Start Date: 07, July 2023

End Date: 06, June 2024

Team Size: 20

Website Redesign for E-Commerce Platform

We revamped the website for an e-commerce platform to enhance user experience and improve conversion rates.

Status: completed

Start Date: 02, February 2023

End Date: 04, April 2023

Team Size: 10

Mobile App Development for Healthcare

Developed a mobile application for healthcare providers to streamline patient scheduling and medical records management.

Status: active

Start Date: 05, May 2023

End Date: 05, May 2024

Team Size: 18

Automation System for Manufacturing Plant

We developed a custom automation system for a manufacturing plant, improving efficiency and reducing manual labor.

Status: completed

Start Date: 01, January 2023

End Date: 03, March 2023

Team Size: 15

Product Design for Consumer Electronics

Our team successfully designed a new consumer electronics product from concept to prototype, ready for production.

Status: completed

Start Date: 04, April 2023

End Date: 06, June 2023

Team Size: 12

Structural Engineering for Commercial Building

We provided comprehensive structural engineering services for the construction of a high-rise commercial building.

Status: active

Start Date: 07, July 2023

End Date: 06, June 2024

Team Size: 20

Website Redesign for E-Commerce Platform

We revamped the website for an e-commerce platform to enhance user experience and improve conversion rates.

Status: completed

Start Date: 02, February 2023

End Date: 04, April 2023

Team Size: 10

Mobile App Development for Healthcare

Developed a mobile application for healthcare providers to streamline patient scheduling and medical records management.

Status: active

Start Date: 05, May 2023

End Date: 05, May 2024

Team Size: 18

Data Analytics for Retail Business

Implemented a data analytics solution to help a retail business track inventory, sales trends, and customer behavior.

Status: completed

Start Date: 03, March 2023

End Date: 06, June 2023

Team Size: 8

Cloud Migration for Financial Institution

Led the migration of a financial institution's legacy systems to the cloud, enhancing scalability and security.

Status: active

Start Date: 08, August 2023

End Date: 02, February 2024

Team Size: 25

Custom ERP System for Manufacturing Company

Developed and deployed a custom ERP system for a manufacturing company, improving operational efficiency and data visibility.

Status: completed

Start Date: 06, June 2023

End Date: 08, August 2023

Team Size: 22

AI-based Chatbot for Customer Support

Developed an AI-powered chatbot to provide 24/7 customer support for an e-commerce business.

Status: active

Start Date: 09, September 2023

End Date: 03, March 2024

Team Size: 14

Blockchain Solution for Supply Chain

Designed and implemented a blockchain solution to enhance transparency and traceability in the supply chain of a global logistics company.

Status: completed

Start Date: 04, April 2023

End Date: 07, July 2023

Team Size: 30

Enquiries

Select Service Type: [All   ▼]

Alex
Email: alex@gmail.com

Service Type: PRODUCT DESIGN AND DEVELOPMENT

We need assistance in developing a new consumer product with advanced features.

Emily
Email: emily@gmail.com

Service Type: AUTOMATION AND CONTROL SYSTEMS

We are looking for a custom automation solution to improve our manufacturing processes.

David
Email: david@gmail.com

Service Type: STRUCTURAL ENGINEERING SOLUTIONS

We require structural 'DESIGN' for a new office building under construction.

Sarah
Email: sarah@gmail.com

Service Type: ELECTRICAL AND ELECTRONICS ENGINEERING

We need an electrical system designed for a new product prototype.

John
Email: john@gmail.com

Service Type: SYSTEMS INTEGRATION

We need help integrating multiple systems to streamline operations.

We need an electrical system designed for a new product prototype.

John
